## PROFILE

---

I'm an argentinian Web and Python developer, lawyer and poliglot. I respond very well under pressure, and I'm actually good at making things and processes more efficient. Spanish is my native language, while I also fluently speak English (B2/C1), French (B2) and Russian (B2). I worked five years at a District Attorney's Office, and two years in a Courthouse (where I continue working). I enjoy coding since it keeps my mind focused on solving problems and challenges, which really motivates me. I'm truly committed to every single thing I do and I don't stop until I get results. I'm the guy who gets the job done. I studied Python, which I sincerely like, and I'm currently studying at Coderhouse, in Argentina the career of Frontend Developer (HTML, CSS, JavaScript and React) while I'm also studying django on my own. Besides, I'm attending a course at the Data Science Institute in Argentina to get a Diploma on Data Science with Python (Neural Networks, Decision trees, Exploratory Analysis, Knn, Unsupervised learning, Naive Bayes, Vector Support Machines, Linear and quadratic discriminant), so that I can then dive into Machine Learning and A.I. Efficiency is always my goal, making the most of something with the least amount of resources (and I'm used to working with almost no resources).

## ACADEMIC BACKGROUND

---

### DATA SCIENCE WITH PYTHON, "Instituto Data Science", Argentina

JUNE 2021 - NOVEMBER 2021

Python, Neural Networks, Decision trees, Exploratory Analysis, Knn, Unsupervised learning, Naive Bayes, Vector Support Machines, Linear and quadratic discriminant

### Frontend Web Developer, "CoderHouse", Argentina

JUNE 2021 - JANUARY 2022

HTML, CSS, SASS, JavaScript y React.js.

## **Python Programmer, "ITMaster", Argentina**
